GRAND PRIX SAILCLOTH CHOICE

X Tech - Kevlar yarns sandwiched between two layers of Polyester film. A version with one layer of taffeta is also available, which makes the material more durable.

GPL - carbonfibre yarns sandwiched between two layers of Polyester film. GPL is the most stable laminate on the market but does require careful handling.

H5 - the new Hyde membrane system. H5 is available in a large variety of fibres and constructions.

SHAPE
showing a Hyde Grand Prix mainsail perfectly designed to match the bend of the mast.

HEAD
showing radial patch and alloy headboard with pressure slide to absorb leech loads.

LEECH REEF
showing the first reef patch overlapping the top of the clew patch, the stainless pressed ring and the alloy leech line cleat.

TACK
showing radial patches, webbed on stainless tack ring and pressed stainless steel Cunningham eyelet.

CLEW
showing radial patches, alloy leech line cleat and webbed on stainless clew ring and leather anti-chafe wrap.
